

High breaking strength + Fuel savings = BrezTop

Designed to reduce the drag of your trawls,
BrezTop will help you to save fuel.

BrezTop is lighter than standard green PE for the **same breaking strength**. For example, you can replace standard 4 mm green PE netting with 3 mm BrezTop to make your trawl 20 % lighter and easier to tow.

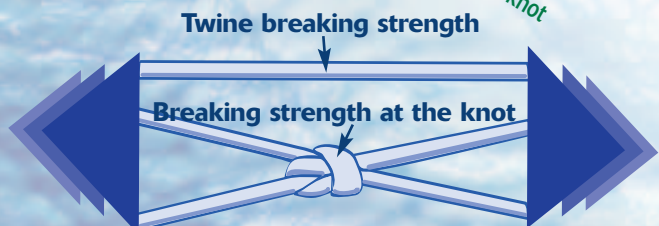

A combination of high tenacity monofilaments and a special twine construction have made it possible to give BrezTop twine a **high breaking strength**, with an exceptionally high breaking strength in the knot as well.

Technical data

Standard green PE				BrezTop			
				4 mm	200	230 kg	280 kg
4 mm	190	187 kg	243 kg	3 mm	238	189 kg	245 kg
3 mm	260	139 kg	179 kg	2 mm	367	110 kg	161 kg
2.5 mm	365	91 kg	138 kg	1,7 mm	526	84 kg	113 kg
				1,2 mm	770	60 kg	75 kg

Labels for the table columns: Diameter, Runnage (m/kg), Twine breaking strength, Breaking strength at the knot. Labels for the diagram below: Diameter, Runnage (m/kg), Twine breaking strength, Breaking strength at the knot.
